

Manufacturer: Sumitomo

Product Name:

Sumitomo FC-8R Precision Fiber Cleaver

Manufacturer Part Number:

FC-8R

The FC-8R is Sumitomo Electric Lightwave's newest 1-Step optical fiber cleaver with automatic blade rotation and a digital cleave counter. It is the ideal tool for use in fusion splicing, field termination, or any application that requires precision in a confined space. It has a simple cleaving operation that can be performed in the palm of the hand, allowing the user to take the cleaver to fiber in limited slack or cramped applications. A built-in extra large fiber scrap collector handles scrap fibers resulting from the cleaving process.

FEATURES

- Smart Cleave Counter
- 1 to 12-Fiber Ribbon Cleaver
- Automatic Blade Rotation
- Ideal Cleaver for Mechanical Connectors
- Ideal Cleaver for High Volume Precision Cleaving Applications in Any Environment
- Compatible with All Sumitomo Electric Fusion Splicers
- Precision Blade Performs 60,000 Cleaves
